Charge Your Phone While Recharging the Power Bank

Supports Wired
Charging

Supports Wireless
Charging

Charging Stops at 80%?

Your iPhone may stop charging at 80% to protect the battery. This can happen if it gets too warm during charging as part of iOS 17's thermal control strategy. Charging will resume once the device cools down. Moving your iPhone to a cooler area may help.

*Data based on internal laboratory testing.

Built with Bio-Based Nylon

46% of the exterior of the cable body
and the connector casing are made from bio-based materials.

Charge Your iPhone at High Speed

Reducing Plastic for a Greener Future

Built with Bio-Based Materials

The exterior of our bio-based cables is around 46% composed of a proprietary mixture of plant-based materials. Using plant matter in our cables allows us to cut down on petroleum-based plastic such as TPE.

*Data based on Jun. 2022 BETA laboratory testing.

Reducing Plastic for a Greener Future

Zero-Plastic Packaging

We've reduced the amount of plastic used in packaging for the entire lineup by an average of 90%. The inner material of the packaging has been changed from plastic to pulp, the packaging paper is FSC-certified 100% recyclable, and printing is done with natural soy ink.

*Calculated based on Aug. 2022 internal testing to measure the weight of plastic reduced in the packaging.

Discover Dual 4K Brilliance

Unlock a world of detail with dual 4K at 60Hz
clarity for spectacular imagery.

Note: For dual displays, you'll need two data cables. Please ensure
that your laptop features two USB-C ports that support 20 Gbps or
use a compatible hub/dock.

Bio-Based Materials

Our cable is designed for a greener future. Around 40% of the
cable's exterior body is made from a proprietary mixture
containing plant-based materials like sugar cane and corn,
effectively reducing petroleum usage by 30-40%.

Note: Data based on internal lab testing.

Plastic-Free Packaging

Our commitment to the environment extends to our packaging with a
100% reduction in plastic usage. The inner material has transitioned
from plastic to pulp, and the outer packaging paper is FSC-certified for
100% recyclability, all while using natural soy ink for printing.
